

Introduction to Social Media

(Solutions to Review Questions and Problems)

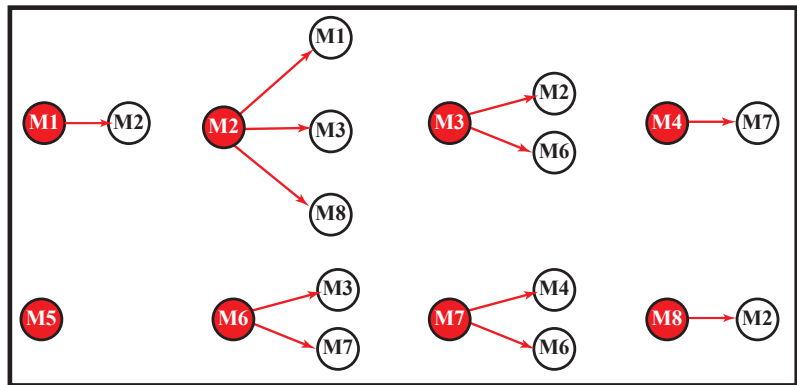

Review Questions

- Q19-1.** In Facebook the relationship is *friendship*; a member has some friends. In Twitter the relationship is *following*; a member follows other members.
- Q19-3.** In Twitter, a member does not determine and does not know who should receive her tweets. A follower decides who to follow and receives tweets from any member that she is following. In other words, the decision is made by the receiver, not the sender.
- Q19-5.** The answer is no because in Twitter, a follower of a follower is not a direct follower.

Problems

- P19-1.** Figure 19.1 shows the situation.

Figure 19.1 Solution to Problem 19.1

P19-3. Figure 19.2 shows the situation.
